Practice Chapter 9: Using Subqueries PART I

Overview

In this practice, you write SELECT queries using subqueries

Chapter 9 practice 1 for chapter 9 lesson 1,2
1. Write a query to display employee last name, hire date, department ID for all employees who were hired after the employee name 'Lee'
2. Write a query to display employee last name, salary, department name for all employees who earn more than or equal the average salary. Order the output by salary

Chapter 9 practice 2 for chapter 9 lesson 3
1. Write a query to display the employee last name, salary, email of all employees who work in a department with any employee whose last name starts with a letter "J"
2. Write a query to display a list of all employees whose salary is more than the salary of any employee from department number 110

Chapter 9 practice 3 for chapter 9 lesson 4
1. Write a query to display the last name , job ID and the department ID of all employees whose job id and department id is the same as the employee name ='Lee'
